Frontend-focused Computer Science student with hands-on experience building responsive, full-stack web applications using React.js, Vue.js, Node.js, and Laravel. Shipped and deployed multiple production applications, including a full-stack recruitment platform with real-time features and a civic-tech AI platform. Completed a 6-month professional React.js internship. Comfortable working across the stack with AI-assisted tools (Cursor, GitHub Copilot) while understanding the underlying logic well enough to debug, extend, and explain it.

PROJECTS

SkillMatch - AI-Powered Job Matching & Recruitment Platform

2026

- Architected a full-stack recruitment platform matching candidates to jobs by skill, with employer applicant pipelines, interview scheduling, and real-time notifications
- Built with React 18, Vite, Tailwind CSS, Node.js/Express, MongoDB, and Socket.IO for real-time chat and live updates
- Implemented secure JWT authentication with email verification, 2FA, and Google/LinkedIn OAuth, plus role-based candidate/employer/admin dashboards
- Integrated Google Calendar/Zoom for auto-generated meeting links and Resend for transactional email delivery

Prizren Smart City - AI-Powered Civic Issue Reporting Platform

2026

- Built a citizen reporting platform for municipal issues (roads, lighting, waste) featuring photo upload, GPS geolocation, and an interactive live map with clustering
- Implemented AI-powered issue classification (category, severity, confidence scoring) using Claude Vision API, with admin review and override
- Designed an admin-configurable institution-routing engine assigning reports to departments based on category, priority, and SLA rules
- Implemented secure JWT authentication with refresh tokens, Google/Facebook OAuth, 2FA, and email verification via Resend
